

# Crane Safety – Safety Precautions for Working Near Overhead Pow Infographic

## Crane safety

- Ensure load/lift limits are fully adhered to
- Ensure the crane is as close to the load being lifted as possible

---

- When performing lifts, keep loads as low to the ground as is reasonably safe
- Secure the load once it has been lifted and properly stow the crane, stabilizers, winches and any other moving parts

---

- Receiving on-going, certified crane safety training is critical for all personnel.

An infographic titled 'Crane safety' with a grey and white background. It features three illustrations: a crane lifting a load, a crane with a load suspended, and three workers in hard hats reviewing a set of plans. The text is arranged around these illustrations, with a dashed horizontal line separating the top and bottom sections.
