

Drug and Alcohol-Free Workplace – Landscaping Infographic

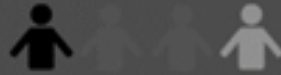

BENEFITS OF A DRUG-FREE WORKPLACE

Employers who drug test can:

REDUCE ABSENTEEISM

Did you know that workers who use drugs are 59% more likely to miss work?

REDUCE TURNOVER

Did you know that workers who use drugs are 47% more likely to be terminated?

REDUCE THEIR LIABILITY FOR ACCIDENTS

Did you know that 35% of workplace injuries involve drugs or alcohol?

What this means for employees:

Health and Safety

Workers are less likely to be injured because of an impaired coworker's mistakes – especially in safety-sensitive jobs.

Improved Morale

Employees encounter less conflict in a drug-free workplace. Meanwhile, employer commitment to worker safety shows employees that the company cares.

Reduced Insurance Costs

Drug use causes a lot of health problems, and frequent insurance claims can increase everyone's premiums.

A Second Chance

Many employers give workers who fail a drug test the opportunity to get help through rehab and return to work clean and sober.
