DRY CLEAN

AVOID THESE FIVE MISTAKES!

More and more people are turning to dry cleaning as a hassle free way to deal with laundry. For best results, keep these tips in mind:

#1

Sending The Wrong Clothes

This is a very common mistake people make. Not every fabric is dry clean compatible. Make sure you are aware which clothing item in your wardrobe is dry clean safe.

#2

Not Emptying The Pockets

Items made of fragile plastic like pens can dissolve during the dry cleaning process and damage the textile permanently.

#3

Excessive Dry Cleaning

Have your clothes dry cleaned only when necessary.

Although it's a fairly safe laundry process, too much of anything can be harmful.
