Electrical Injuries Fatality Report

A Fort Worth man who was shocked while doing electrical work at a home has died, according to the Tarrant County medical examiner’s website.

Jose Ismael Angel Perez, 33, died Saturday at a local hospital. He died from injuries suffered in a low voltage electrocution and his death was an accident, according to an ruling by officials with the medical examiner’s office.

The accident occurred about 2 p.m. Wednesday at a home in the 1700 block of Belmont Ave. This was not the victim’s home, authorities said.

Firefighters responded to a report that a man had been working on a home when he was suddenly shocked,

Firefighters responded to the home where they found the man unconscious.

A man in his 30s is in critical condition after a person reported seeing him get shocked by electricity as he worked on a home in Fort Worth, authorities said.

The man was transported to Texas Health Harris Methodist Hospital, according to a MedStar spokesman. Mike Drivdahl, a Fort Worth Fire Department spokesman, said the man was unconscious and in critical condition when firefighters and medics took him to the hospital.

The fire department can’t confirm whether or not the man was shocked, but they received a report a man had been working on a home when he was suddenly shocked, Drivdahl said. Firefighters responded to the home in the 1700 block of Belmont Avenue a little before 2 p.m. Wednesday.

It’s unclear whether the man lived at the home or was a hired professional working on the home.

The man remained in critical condition in the hospital Wednesday afternoon, according to Drivdahl and MedStar.
