

# Five Ways to Stay Safe When Working on Refrigerated Containers “Reefers” in Marine Terminals Poster

Check that cords and receptacles are clean, dry, and in good condition before energizing reefers.

## Five Ways to Stay Safe When Working on Refrigerated Containers “Reefers” in Marine Terminals

1

Check that cords and receptacles are clean, dry, and in good condition before energizing reefers.

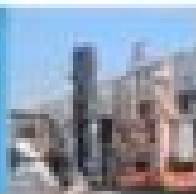

2

Recognize hazards, such as electric shock, carbon monoxide gas, and fire, and know how to safely mount and dismount nose- and belly-mount generator sets.

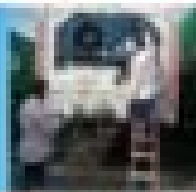

3

Operate forklifts safely and observe speed restrictions. Maintain equipment and train operators according to 29 CFR 1910.178.

4

Inspect ladders, forklift man baskets and other lifting devices prior to use or operation.

5

Keep walkways and access areas clear and dry to prevent slips, trips, and falls.
