

Forklift Fatalities and Injuries – Picture This – Spanish

REGLAS BÁSICAS EN LA OPERACIÓN SEGURA DE MONTACARGAS

When you park the forklift, do not leave it running, and do not block emergency equipment, exits or electrical control panels. Turn off the engine and remove the key.

Check the forklift's checklist (check list) before starting the forklift operation at the beginning of the shift. Notify any deterioration you find.

Do not let pedestrians pass under the forks.

Do not push the load with the fork tip.

Do not drive with the forklift forks up by 15 cm, whether with or without a load.

If the load obscures your forward visibility, drive in reverse, turning your body.

Never load or unload a forklift while it is moving; you must make one movement at a time.

Know and respect the forklift's limits. Consult the data plate.

Do not transport unstable loads. Remember to keep the load as close as possible to the forklift's mast.

Respect the speed limits established by the company.

Do not transport or lift people.

Respect pedestrian crossings and crosswalks.

Perfil del operador de montacargas

- Conocimientos
- Habilidad
- Actitud
- Contar con la Constancia de Competencias o de Habilidades Laborales Formato DC-3
