

Hazard Points and Guarding on farm equipment Picture This

Mantain
3-Point Contact
When Getting On And Off A Tractor

☒ When climbing on and off a tractor, always keep three points of contact (eg two hands and one foot) with the tractor or ground.
Get off facing towards the tractor (the same as you do when mounting).

☒ Clean the steps regularly. You are more likely to slip and fall if the tractor steps are dirty or wet.

☒ Never jump on or off a moving tractor.
