HEALTH RISKS FOR WELDERS

Why you must not neglect safety when welding

At Craigmore we are proud stockists of only the highest quality welding machines and safety equipment. With an extensive inventory combined with our 25 years of experience we can guarantee our customers the highest quality welding equipment, welding supplies, and industrial gases when they need it.

We understand the challenges welders face, this is why it is vital that the welding equipment is lightweight, ergonomic in design and comfortable allowing you to work with precision. We have established partnerships with many world renowned brands such as Parweld, SIP and 3M.

DON'T BECOME A STATISTIC

90%

90% workplace eye injuries are preventable with proper safety eyewear

25%

25% of all accidents in the workplace involved hands and fingers

1%

Only 1% of 770 workers suffering face injuries were wearing face protection

COMMON HEALTH RISKS

Pneumonia
Irritation
Reduced Function

Nerve disorders
Brain damage
Nervous system damage

Chronic damage
Corneal burns

Kidney Damage

SAFETY TIPS

- Use mats of plywood (or other insulation) to stand or lie on
- Remove all fire hazards for at least 10m
- Have a fire extinguisher close by for immediate action
- Look for frayed welding leads before working
- Always use proper PPE when welding
