

# Hearing Protection Devices Infographic

NOISE INDUCED HEARING LOSS  
IS THE #1 OCCUPATIONAL DISEASE

WHY ARE WE SILENT ON THE ISSUE?

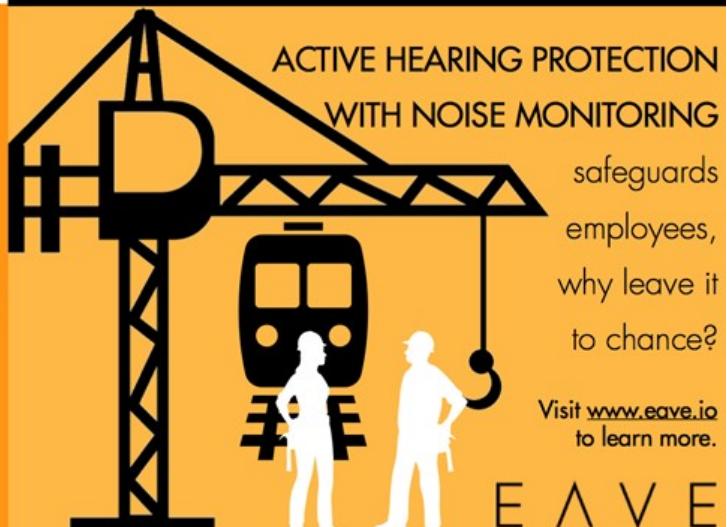

Passive  
hearing  
protection  
inhibits  
situational  
awareness.

48.3%

of all work  
fatalities are  
linked to  
failures of  
situational  
awareness.

Without data  
it is impossible  
to know if the  
right hearing  
protection is  
used.
