

How to Use Tailgate Talks Picture This

BEST PRACTICES FOR RUNNING A SAFETY TOOLBOX TALK

Safety Toolbox Talks are a great way to keep safety front of mind on a construction site. Here are our top 5 best practices for giving great Toolbox Talks.

Jobsite Supervisors Take the Lead

The safety director should train job site supervisors on the best practices of conducting Safety Toolbox Talks.

Keep Topics Timely

Toolbox Safety Talks should be timely and relate to the current job.

Choose a schedule

Pick a schedule for toolbox talks and stick to it. For example, F.E. Moran has Toolbox Talks monthly.

Keep them Short & Sweet

Safety Toolbox Talks are generally between 10 and 15 minutes long.

Document Attendees

Always document Toolbox Safety Talks attendees. This proves to OSHA that you delivered the OSHA Hazard Communication Standard requirement.
