

# Occupational-Related Cancer Picture This

## CANCER AWARENESS FIREFIGHTERS ARE AT RISK!

FIREFIGHTERS HAVE  
A HIGHER RISK  
of contracting

# ALL

types of cancer than the  
general U.S. population.

Synthetic building materials  
used in modern structures,  
including furniture and paint,  
**RELEASE CARCINOGENS**  
when burned.

## WE HAVE AN OPPORTUNITY TO **SAVE LIVES!**

Cancer is a leading threat  
ALL to firefighters.

For every 5° increase in temperature,  
**skin becomes up to  
400% MORE ABSORBENT.**

The hotter you  
are, the more  
carcinogens  
your skin  
absorbs

**MORE THAN  
60%**

Since 2002, the IAFF has attributed more than  
**60% of its firefighter LODDs  
TO CANCER**  
MORE THAN ANY OTHER CAUSE

### FIVE THINGS YOU CAN DO

1

Wear your SCBA from  
the fire attack through  
overhaul to limit  
inhalation of  
carcinogens.

2

Clean yourself off  
during gross decon to  
remove soot as soon  
as possible.

3

Keep contaminated  
gear out of your  
station's living and  
sleeping quarters.  
Also, don't take  
contaminated gear  
home.

4

Make sure your gear  
is cleaned and  
inspected regularly by  
a verified ISP.

5

Maintain a personal  
exposure log of all  
fire calls.
