

Off-the-Job Stats & Facts

The most recent statistics from the Association of Workers' Compensation Boards of Canada (AWCBC) tell us that in 2018, 1027 workplace fatalities were recorded in Canada, an increase of 76 from the previous year. Among these deaths were 27 young workers aged 15-24.

Add to these fatalities the 264,438 accepted claims (an increase from 251,508 the previous year) for lost time due to a work-related injury or disease, including 33,058 from workers aged 15-24, and the fact that these statistics only include what is reported and accepted by the compensation boards, there is no doubt that the total number of workers impacted is even greater.

And it's not just these numbers on which we need to reflect. With each worker tragedy there are loved ones, family members, friends and co-workers who are directly affected, left behind, and deeply impacted – their lives also forever changed.

One of the challenges in workplace safety and health is the rapid growth of new occupations like the solar photovoltaic installer, which is expected to grow by nearly 105% over the next several years, and the wind turbine service technician, which is expected to grow by over 96%.

Several other rapidly growing occupations include jobs in the healthcare field:

- Home health aide, expected to grow 47.3% by 2016;
- Personal care aide, expected to grow 38.6%;
- Physician's assistant, expected to grow 37.5%;
- Nurse practitioner, expected to grow by 36.1%; *and*
- Physical therapist assistant, expected to grow by 31%.

Digital transformation, globalization, and technological innovations have accelerated the speed at which work changes, according to NIOSH. Complex, emerging workforce issues confronting both employers and workers include:

- An aging workforce;
- Concerns about gender pay and employment disparities;
- Recruiting and retaining workers in highly competitive labor markets;
- Shifting employment relationships like contingent or "gig" employment; *and*
- Uncertainty about how best to manage new technologies entering into the workplace

Statistics:

- 90% of job seekers say that it's important to work for a company that embraces transparency.

- 79% of job seekers say they are likely to use social media in their job search
- On average, each corporate job offer attracts 250 resumes. Of those candidates, 4 to 6 will get called for an interview, and only one will get the job.
- 1 in 6 candidates who applied for a job were asked for an interview.
