PPE – Personal Protective Equipment: Hand Protection

Key Takeaways:

– Appreciating the value of hand PPE
– Observing common hand workplace hazards
– Observing the common characteristics of hand PPE
– Identifying common types of hand PPE
– Understanding the proper fit for hand PPE
– Learning how to care for hand PPE
– Acknowledging employee and employer responsibilities regarding hand PPE

Course Description

How valuable are your hands? Often, people don’t realize the importance of their hands until they aren’t able to be used any longer.

A million workers are sent to the ER each year because of hand injuries, making them the No. 2 leading cause of work-related injury and the most preventable through proper personal protective equipment (PPE).

The aim of our course is to help users recognize, identify and describe the value of PPE for hand safety.
