Preventing Silicosis Infographic

Prevention of Silicosis?

Prevention of Silicosis can be obtained by following these helpful tips:

Use all available engineering controls such as blasting cabinets and local exhaust ventilation. Avoid using compressed air for cleaning surfaces. Use water sprays, wet methods for cutting, chipping, drilling, sawing, grinding, etc. Substitute non-crystalline silica blasting material. Use respirators approved for protection against silica; if sandblasting, use abrasive blasting respirators. Do not eat, drink or smoke near crystalline silica dust.

Wash hands and face before eating, drinking or smoking away from exposure area.
