

# Process Safety Management Depends on You! Poster

Employers are responsible for providing a safe and healthy workplace for their employees.

**Process Safety Management  
Depends on You!**

- Know the hazards associated with mixing, separating or storing process materials and chemicals. Participate in Process Hazard Analyses and Incident Investigations.
- Make sure your equipment is working properly at all times. Tell your supervisor immediately when it is not.
- Know how your process operates and what to do in an emergency or a near miss.

Employers are responsible for providing a safe and healthy workplace for their employees. OSHA's role is to promote the safety and health of America's working men and women by setting and enforcing standards, providing training, outreach and education, establishing partnerships, and encouraging continual improvement in workplace safety and health. For more information about safety in your chemical processing plant, talk with your employer, or visit [www.osha.gov](http://www.osha.gov).
