Suspended Work Platform/Boatwain’s Chair Training Verification Form

BENEFITS

You must ensure workers required and permitted to use a suspended work platform or boatswain’s chair successfully complete a training program. Training must be done before a worker is permitted to use the suspended work platform or boatswain’s chair for the first time, and as often as necessary after that but no later than at least every three years.

HOW TO USE THE TOOL

Adapt this form for your OHS program and the requirements of applicable OHS laws. Use it to document that you’ve provided training to workers, what that training covered and that the workers understood their training and demonstrated how to use the equipment on which they were trained. Retain these completed forms in the event your training is questioned.
