

# Taking Safety For Granted Picture This

## What's wrong in this picture?

Along with common injuries such as cuts, lacerations, and bruises, the frequent and prolonged use of hand tools and electrical tools can cause soreness, aches, pains, fatigue, and amputation.

Keep the work environment clean and tidy to avoid clutter which may cause accidents.

All PPE should be free of holes or tears. Also very important: PPE needs to fit well. A major complaint, especially about gloves, is that they are awkward and don't allow free movement. PPE is never a one-size-fits-all proposition. Providing the appropriate gloves is critical, since lack of hand protection is a major cause of injuries.
