5 Safety Tips Every Employee Should Know

progressive
experts in your field

1

No shortcuts

Make sure, when operating tools and machinery, to follow instructions. Procedures exist to keep employees safe.

2

PPE

Make sure you're always wearing the right personal protective equipment, such as a hard hat, goggles, earplugs, and coveralls.

3

Know your surroundings

The more familiar you are with your tasks and workplace, the more aware you'll be of the potential hazards.

4

Report unsafe conditions

While your employer is legally required to provide a safe workplace, they may be unaware of any unsafe conditions. If you're aware of anything potentially hazardous, report it to your supervisor.

5

Take a break

Our brains just weren't built for the extended focus we demand of it. Give yourself a break to regain focus, and thereby become more aware of your surroundings.
